ZAW MYO TUN

Junior Software Developer · Python & AI Solutions Builder

Higher National Diploma in Software Engineering (Merit) · BSc Computing Candidate

Email: zawmyotun.kl@gmail.com
GitHub: github.com/Z-Dev-Coder
Portfolio: z-dev-coder.github.io/portfolio/
Location: Mandalay, Myanmar (Remote Ready)

Executive Profile: Results-oriented Junior Software Developer with a Higher National Diploma in Software Engineering (Merit) and active BSc in Computing candidate. Proficient in Python, Django, RESTful APIs, relational schema modeling, and cutting-edge AI agent architectures (LangGraph, pgvector vector search, self-hosted Ollama models). Combines disciplined project coordination cultivated in physical civil engineering with high-velocity agile delivery (VibeCoding).

CORE TECHNICAL COMPETENCIES

AI & AGENTIC SYSTEMS

LangGraph: State graphs, dynamic routing & context cycles
RAG Architecture: PostgreSQL pgvector cosine similarity search
Local Inference: Ollama self-hosted models ($0 cloud cost)
Prompt Engineering: Structured output parsing & handover logic

BACKEND ENGINEERING & APIS

Python 3.12 & Django: Django REST Framework (DRF), ORM
Databases: PostgreSQL & SQLite, relational schema modeling
WebSockets: Django Channels real-time asynchronous chat
Security: Granular Role-Based Access Control (RBAC) & JWT

FRONTEND & MOBILE ENGINEERING

React 19 & Vite: Component lifecycle, modern hooks, SPA state
Tailwind CSS: Modern responsive utility styling & dark themes
Android (Java): Native Android Studio SDK, XML layouts, OOP
JavaScript/TypeScript: Modern asynchronous ES6+ syntax

SDLC, AGILE & ENGINEERING PRACTICES

Agile / Scrum: Jira sprint cycles, daily standups, backlog triage
Git & GitHub: Branching strategies, PR reviews, code hygiene
System Design: SRS, SDD, UML class/sequence diagrams, ERDs
AI-Assisted Dev: Accelerated prototyping & verification (VibeCoding)

FEATURED SOFTWARE & AI PROJECTS

JumpStart AI Support Chatbot

`HDSE Capstone Project`

Repository: github.com/Z-Dev-Coder/JumpStart-AI-Supported-Chatbot

Enterprise multi-agent customer support automation platform engineered to resolve complex domain inquiries using semantic knowledge retrieval and real-time human agent escalation.

- Engineered multi-agent state machines via LangGraph with state persistence across multi-turn user dialogues.
- Implemented RAG knowledge retrieval using PostgreSQL pgvector cosine similarity search over corporate knowledge bases.
- Configured dynamic confidence evaluation to trigger automated real-time escalation to human agents over WebSockets.
- Built bidirectional real-time user-agent chat channels using Django Channels and asynchronous socket consumers.

`Python 3.12` `Django` `LangGraph` `pgvector` `PostgreSQL` `WebSockets` `REST API`

English Coach AI EdTech Platform

`AI EdTech Platform`

Repository: github.com/Z-Dev-Coder/english-coach

Adaptive educational platform evaluating student submissions against a comprehensive 8-skill CEFR matrix to generate personalized drills and grammar corrections at $0 cloud cost.

- Integrated local Ollama LLM inference (Llama/Mistral) delivering $0 cloud API token overhead and user privacy.
- Architected an 8-skill CEFR diagnostic matrix evaluating grammar, vocabulary, fluency, and reading comprehension.
- Generated instant diagnostic explanations and tailored exercises calibrated to user proficiency gaps.
- Built decoupled React + Vite user interface interacting with Django REST Framework endpoints.

`React 19` `Django REST` `Ollama` `Local LLM` `Tailwind CSS` `Python`

MerryMeal Charitable Logistics Platform

`Agile Scrum Capstone`

Repository: github.com/Z-Dev-Coder/MerryMeal

Charity meals-on-wheels platform delivered by a 5-member Agile Scrum team (Tech Titans) to coordinate donor funds, kitchen food preparation workflows, and volunteer delivery routing.

- Delivered through 3 structured Scrum sprint cycles with Jira tracking, daily standups, and retrospective documentation.
- Implemented granular Role-Based Access Control (Admin, Kitchen Staff, Donor, Volunteer, Member).
- Programmed 10km GIS geofenced delivery feasibility validation to route hot meals vs frozen meal packages.
- Authored comprehensive Software Requirements Specification (SRS) and UML system architecture models.

`Django` `Python` `GIS Logistics` `RBAC Security` `SQLite` `Agile Scrum`

DoBu Martial Arts Academy Portal

`Live Production Demo`

Repository: github.com/Z-Dev-Coder/DoBuMartialArts | **Live Demo:** z-dev-coder.github.io/DoBuMartialArts/

Modern, responsive multi-page fitness and martial arts academy web portal featuring interactive membership calculators and live class timetable schedules.

- Engineered interactive client-side fee calculator with dynamic add-on selections and tiered membership plans.
- Built responsive schedule viewer with filterable martial arts disciplines and trainer bios.
- Deployed global static hosting on GitHub Pages with clean cross-device mobile responsiveness.

`JavaScript ES6` `HTML5 Semantic UI` `CSS3 Flexbox/Grid` `GitHub Pages`

Silent Library Management

`WDF Module`

github.com/Z-Dev-Coder/silentlibrary

Academic LMS with circulation lifecycles, automated fine calculations, and SMTP email overdue reminders.

`Django` `SQLite` `SMTP`

Math Quiz Android App

`BTEC Unit 7`

github.com/Z-Dev-Coder/Math-Quiz-Mobile-App

Native Android arithmetic game with 3 timed difficulty tiers, countdown mechanics, and local SQLite analytics.

`Android Java` `SQLite` `OOP`

EDUCATION & ACADEMIC QUALIFICATIONS

BSc (Hons) in Computing — EduCLaaS Academy

2025 — Present (In Progress)

Advanced curriculum focusing on distributed systems architecture, enterprise software engineering, and modern machine learning concepts.

Higher National Diploma in Software Engineering (HDSE) — EduCLaaS Academy

Graduated with Merit (2023 — 2025)

Comprehensive training in Object-Oriented Programming (Java, Python), Relational Databases (SQL), Web Development (Django), Mobile Applications (Android), and Agile Scrum Project Management.

PROFESSIONAL BACKGROUND & ENGINEERING DISCIPLINE

Site Engineer — Myat Min Construction

Engineering Oversight & Quality Assurance

Supervised physical construction blueprint adherence, conducted daily quality assurance checks, and coordinated schedules across multi-trade teams. Instilled strict problem-solving discipline and structural thinking directly transferable to software architecture.

Senior Sales Executive & Project Lead — Family Retail Business

Stakeholder Relations & Problem Resolution

Directed client relationship workflows, resolved customer challenges, and tracked inventory velocity. Developed high user empathy, active listening, and practical value-driven communication.
