GitHub Profile

COMPETENCIES

Technical Stack & Expertise

Backend & Database

Zaw Myo Tun

Robust server-side architecture, relational schemas, and REST APIs.

Python | Django | Django REST | FastAPI | PostgreSQL | SQLite

AI Engineering & Agents

Practical LLM applications, retrieval pipelines, and AI workflows.

LangGraph | RAG Pipelines | pgvector | Ollama (Local LLMs) | Groq API | VibeCoding

Frontend & Delivery

Responsive layouts, interactive DOM components, and Agile delivery.

HTML5 / CSS3 | JavaScript | Bootstrap 5 | Tailwind CSS | React & Vite | Git & ClickUp

PORTFOLIO

Featured Software Projects

Personal AI Project

Python · Django · React

English Coach — Adaptive Language System

Translates real-world English content into a daily curriculum personalized around 8 independent CEFR competencies rather than a generic flat level. Powered by local Ollama language models at $0 recurring cloud cost.

- 8-skill score tracker (Reading, Speaking, Listening, Grammar, etc.)
- Speaking Script Studio for cadence & pronunciation practice

• Extensible AIProvider architecture with offline fallback

Capstone Project (HDSE-CPL)

Agentic RAG · LangGraph

JumpStart AI Retail Support Agent

Hybrid customer support system combining stateful LangGraph multi-tool reasoning with pgvector RAG semantic search. Evaluates customer sentiment and confidence to trigger seamless handovers to human agents.

- Autonomous tool execution for orders, returns, and FAQs
- PostgreSQL pgvector similarity search on store policy docs
- Real-time WebSocket live chat + Staff takeover dashboard

Python + Django + React + pgvector

Agile Project (HDSE-PMI)

Tech Titans Team of 5

MerryMeal — Meals on Wheels Platform

Role-based charity web application delivering hot weekday and frozen weekend meals to disabled and elderly beneficiaries. Engineered with GIS delivery radius validation and food safety expiry tracking.

- Distinct portals for Members, Caregivers, Kitchens, and Riders
- 10 km GIS dispatch logic for hot vs frozen meal routing
- Donor contribution ledger and administrative analytics

Python + Django + Bootstrap 5 + MySQL

CAREER JOURNEY

Work Experience

2020 – 2021

Site Engineer

Innovate Myanmar Forward Co., Ltd.

Supervised construction execution, monitored adherence to architectural blueprints, coordinated subcontractor safety, and managed material logistics.

2018 – 2019

Site Engineer

AM Construction Group

Performed quality assurance inspections, maintained site progress logs, and assisted project engineers in survey alignments.

2013 – 2014 & 2021 – 2022

Sales & Customer Technical Support

Power Laptop Sales & Service / Shin Shin Shop

Assisted customers with hardware troubleshooting, operating system setups, inventory management, and client communication.

ACADEMICS

Education & Qualifications

Currently Studying

Bachelor of Science in Computing

Software Engineering Specialization

Zaw Myo Tun

2024 – Aug 2026

Higher National Diploma (HND) in Software Engineering

EduCLaaS, Myanmar

Coursework: Capstone Application Development, Agile Project Management, Enterprise Web Applications, Front-End Development, AI Models, and Database Systems.

2014 – 2020

Civil Engineering Coursework

Technological University, Myanmar

Completed all theoretical and lab engineering coursework through final year 1st semester.

Let's Build Something Together

I am currently seeking opportunities as a Junior Software Developer or AI-assisted web engineer. Feel free to connect for conversations, projects, or inquiries.
